PETITION TO ACCEPT COLOR DRAWINGS IN A UTILITY PATENT
APPLICATION UNDER 37 C.F.R. 1.84(a)(2)

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

Applicant respectfully petitions for the acceptance of color drawings in a utility patent application under 37 C.F.R. 1.84(a)(2).

The color drawings submitted as formal FIGURES 2A and 2B in the above-identified patent application show the same color digital images rendered in normal and natural color depths, respectively. The rendition of the image at a normal color depth uses colors drawn from a full 256-color palette, whereas the rendition of the image at a natural color depth uses a minimal set of colors drawn from a 65-color palette. Slight visual differences are present when comparing the two images directly, yet the reduction to natural color depth preserves the visual perception of the resulting color-reduced image. Illustration of this non-contrary result is best shown through actual color drawings and therefore proposed FIGURES 2A and 2B present the only practical medium by which to disclose the subject matter to be patented.

In view of the above, Applicant requests that this Petition to accept color drawings in a utility patent application under 37 C.F.R. 1.84(a)(2) be granted and examination of the application be advanced.
